

Product Update: NSE's ATSF Bicentennial SD45-2 Locomotive

Hello Everyone,

We'd like to update you with our plans to launch the next production run of N scale SD 45-2 Locomotives. InterMountain has a strong commitment to this N scale locomotive project. We are staged for production but have encountered some unexpected delays that have been beyond our control, specifically the recent pandemic and inability for InterMountain staff to travel to the factories for design, testing, and quality control. These issues have slowed our anticipated progress.. We are advancing the project, ensuring that it meets our expected high quality standards in spite of these obstacles and will continue to communicate as soon as new developments are available.

Thanks and best regards,
Ron Angstead
InterMountain Railway Company
